

COULD IT BE CANCER?

Question the marks on your skin.

Skin cancer among Delawareans increased an alarming 78 percent compared with the national average of 14 percent.* It kills approximately 31 Delawareans each year.* People who work in the sun are most at risk.

HERE'S HOW TO LOWER YOUR RISK:

- Always cover up, and wear sunscreen with an SPF of 30 or above.
- Regularly examine your skin for spots, moles, or irregularities, from head to toe.
- Track any changes in size, height, color, or appearance of moles over time.
- If something's not right, see a health care provider or dermatologist.

HERE'S WHAT SKIN CANCER LOOKS LIKE:

Basal Cell Carcinoma

Malignant Melanoma

Solar Keratosis (Precancerous)

Squamous Cell Carcinoma
